

I was interested in becoming a parent-governor as I really don't know very much about how schools operate. With my child having just started school I felt it was a good time to find out more and I am pleased with this role to be able to give something back to the community we live in. I am a keen advocate of lifelong education and strongly believe in creating equal opportunities for all children. As a librarian with 10 years experience in higher education, I very much support helping others to empower themselves through knowledge and self discovery. I live in Holywell and really enjoy running, walking and cycling in our local area. I am looking forward to contributing to the governing body and helping to support our school in any way that I can.
